

Eastto Brake fluid dot 4

Eastto BRAKE FLUID DOT 4 is a red dyed high performance premium quality fully synthetic heavy duty hydraulic brake fluid. It contains anti-oxidant, metal de-activator and corrosion inhibitor for long service life of brake fluid and brake components. Due to its very high Equilibrium Reflux Boiling Point (above 240°C), the vapour locking problem is greatly reduced in high temperature operating condition, especially in cities where stop-and-go conditions require frequent application of brakes. Its excellent low temperature characteristics enable it to function up to minus 40°C.

APPLICATION:

EASTTO BRAKE FLUID DOT 4 is recommended for modern hydraulic braking systems including both disc and drum type in various new generation vehicles.

PERFORMANCE LEVEL:

IS 8654 - 2001
FMVSS 116 DOT - 4
SAE J1703

CHARACTERISTICS	EASTTO BRAKE FLUID DOT 4
Colour	Red
Kinematic Viscosity at 100°C., cSt,	2.2
Kinematic Viscosity at (-) 40°C., cSt,	1300
Equilibrium Reflux Boiling Point, °C. Max.	240

PACKING: 210 Liters Drum
